

Please do not change the rules to allow the use of cellular phones on airplanes. People who merely wish to fly somewhere and enjoy some peace and quiet will be forced to sit in one place and listen to other people's phone conversations, possibly numerous conversations at once. This proposed ruling would take away the rights of many in order to provide some benefit to a few. It would be very intrusive. If you care at all about the American public, then you will not allow the use of cellular phones on airplanes.
